Combining Service And Learning:

Combining Service and Learning Jane C. Kendall,1990 **Principles of Good Practice for Combining Service and Learning** Ellen Porter Honnet,Susan J. Poulsen,1989 The level of interest and sense of urgency in community and voluntary service grows greater every day In every community programs are being designed for participants from kindergartners to the elderly The principles described on these pages reflect the grassroots experience and the thinking of thousands of people hundreds of programs and numerous national organizations over the last several decades They are offered with the hope that current initiatives to create service programs will benefit from a rich recent history Introduction Combining Service and Learning Jane C. Kendall,1990 **Combining Service and Learning in Higher Education** Maryann Jacobi Gray,Elizabeth Heneghan Ondaatje,Laura Zakaras,1999 This volume summarizes the final report MR 998 EDU on RAND s three year evaluation of the Learn and Serve America Higher Education LSAHE program It discusses the major activities and accomplishments of the LSAHE supported programs the impacts of LSAHE on students communities and institutions and the returns on the public assessment in LSAHE It also presents the main conclusions of the evaluation that LSAHE was highly successful in serving communities and had mixed success in promoting student development and institutional change and that even though expenditures exceeded the value of LSAHE to communities value increased each year suggesting that long term positive returns may occur Service-Learning at the American Community College A. Traver,Z. Katz,2014-10-22 This volume brings together a breadth of new research on how service learning combining community based experiential learning with classroom instruction can best be employed at community colleges It discusses outcomes and best practices for all involved covers both theory and practice and draws on both qualitative and quantitative methods *Service-Learning in Higher Education* Barbara Jacoby,1996-09-27 As an added value the book describes and provides contact information for national organizations that support service learning and resources that are useful in helping students make postcollege service and career choices *Service Learning in Higher Education* is an invaluable resource for all campus professionals including faculty members student affairs practitioners and senior academic leaders who are interested in advancing the goals of student learning and development while simultaneously making a unique contribution to the community

Combining Service and Learning in Higher Education ,1999 The Policy Debate In the past decade colleges and universities have made greater efforts to involve students in community service particularly service learning a special form of community service designed to promote student learning and development Proponents of service learning believe that it stimulates academic performance increases students understanding of the responsibilities of living in a democratic society and encourages students to become involved in the social problems facing their communities Hundreds of college and university presidents most of the major higher education associations and a number of highly influential scholars actively support the development of service learning programs on college campuses At the same time service learning has its critics

particularly among faculty many of whom are skeptical of its benefits Critics contend that service waters down the curriculum further weakening the quality of higher education and that the time students spend volunteering in community agencies as part of a course might be better spent in the library or laboratory Integrating Service Learning and Multicultural Education in Colleges and Universities Carolyn R. O'Grady,2014-04-08 The focus of this book is on the ways in which service learning and multicultural education can and should be integrated so that each may be strengthened and consequently have greater effect on educational and social conditions It offers a significant attempt to forge a dialogue among practitioners of service learning and multicultural education The overriding theme is that service learning without a focused attention to the complexity of racial and cultural differences can reinforce the dominant cultural ideology but academic work that seeks to deconstruct these norms without providing a community based touchstone isolates students and schools from the realities of the larger communities of which they are part Although the chapter authors provide varied perspectives on the benefits and challenges of integrating multicultural education and service learning they all are committed to a vision of education that synthesizes both action and reflection None of the authors pretend to have all the answers to what this integration should look like nor do they believe that today s social problems are easily ameliorated through education Rather they share theories practices failures and triumphs in order to further the conversation about the importance of aligning what educators say about the world and how they act in and on it These authors share the view that multicultural education is truly transformative for students only when it includes a community action component and likewise service learning is truly a catalyst for change only when it is done from a multicultural and socially just perspective It is their hope that the ideas explored in this book will further the work of those who share a commitment to the integration of action and reflection How to Establish a High School Service Learning Program Judith T. Witmer,Carolyn S.

Anderson,1994-07-15 This is a highly practical book for anyone interested in establishing or maintaining a service learning program at the high school level It explains the origins purpose goals and principles of service learning discusses program design options and factors that need to be considered when establishing a program offers guidance on starting and operating a program and offers guidance for overcoming common obstacles and challenges Appendixes list other sources of valuable information Note This product listing is for the Adobe Acrobat PDF version of the book **Studying Service-Learning**

Shelley H. Billig,Alan S. Waterman,2014-04-04 Presents innovations in research methodology as these are implemented in the study of service learning and provides recommendations to professionals doing research on service learning and on any form of experiential education or educational reform Service-learning Alan S. Waterman,2014-03-18 Linking research and educational practice for the benefit of both is not a new idea If practice such as service learning is a bold departure from the status quo however research is not just beneficial it is critical If schools are to become laboratories of democracy and entrepreneurship and if students are to become engaged as partners in renewal of their communities a research case must

be made for service learning Does learning take place Will other kinds of learning suffer What kinds of practice are most effective Clearly solid research is essential if this transforming way of teaching and learning is to be fully integrated into American schooling and youth development institutions The National Youth Leadership Council NYLC took a first step toward joining service learning practice with research in 1983 In 1991 NYLC created a center which initiated and encouraged program evaluation formative research that informs and improves practice and summative studies that measure results This volume grew out of a National Service Learning Conference an annual event convened by the NYLC A day long research seminar at the conference brought together researchers to discuss the latest developments among themselves and with practitioners Impressive in their range and rigor their papers offer documentation and analysis useful to an emerging research knowledge base It is a starting point for the evidence needed to firmly establish service learning for K 12 age people as a widely accepted way of teaching and learning

Service-Learning in Higher Education Phylis Lan Lin, 2010-10-14 This book emerges from the discourse of the Third International Symposium on Service Learning held at the University of Indianapolis in Athens Greece in November 2009 as part of the biennial collection of papers on service learning This fourth collection highlights service learning SL theories and methods in higher education presents selected case studies of local projects that exemplify the theories and methods in action and points the way toward future possibilities for international partnerships Part One demonstrates how practitioners have translated SL theory into model programs of best practices Part Two examines nationally based SL experiences that enrich indigenous local communities national communities and teaching institutions Part Three explores international SL ISL programs with their unique reciprocal national relationships hybrid methodologies and site specific challenges Part Four covers networking national SL settings to international venues while forecasting SL concepts that span academic disciplines and geographic distances The selected papers in this collection were contributed by educators in twenty three universities in four countries

Community Service-Learning Rahima C. Wade, 1997-01-01 Presents a comprehensive resource for those interested in youth involvement in community service as part of the public school curriculum

Social Work and Service Learning Virginia Majewski, Meryl Nadel, Marilyn Sullivan-Cosetti, 2007-06-21 Service learning and social work education comprise an exciting yet underutilized partnership This book represents the first comprehensive overview of this active and empowering approach to learning in social work Both educators and practitioners will discover conceptual and practical guidance for developing productive community based projects Often envisioned as located at the midpoint on a continuum from volunteer work to internship service learning combines the opportunity to serve with the opportunity to learn It offers community agencies a chance to collaborate with academic colleagues to meet identified community needs frequently with an explicit social justice dimension The contributors illustrate how service learning facilitates students understanding and interacting with community members as partners not clients Service learning encourages students to use critical thinking skills to reflect on their work and its implications This

combination of study action reflection in conjunction with course content is highly effective The book explores its subject from several perspectives The first section serves as a conceptual and theoretical orientation to service learning in social work The second section offers models that illustrate many ways of implementing service learning across the components of the social work curriculum The final two parts of the book focus on evaluation and service learning in the broader context of civic engagement
