K. Ching, 1991-01-16 Drawing relies on a clear vision It also requires thought which in turn builds understanding Drawing cannot be detached from seeing and thinking about the fundamental nature of the subject matter being represented The knowledge and understanding gained through drawing from life directly enhances our ability to draw from the imagination Just as thought can be put into words ideas can be made visible in a drawing to promote visual thinking and further stimulate the imagination Once what is seen or imagined is made visible in a drawing the image takes on a life of its own and communicates graphically However eloquently or crudely all drawings speak to the eye From the Preface Francis D K Ching **Drawing; a creative process** F.D.K. Conference on Art Design and Digital Technology ADDT 2023 was successfully held on September 15-17, 2023 in Xi'an, China. ADDT 2023 created a forum for idea sharing and research exchange, opened up new perspectives in related fields, and broadened the horizons of all participants. In the conference, 100 individuals around the world took part. The conference was divided into three parts: the conference agenda, keynote speeches, oral presentations, and online Q&A discussion. Firstly, the keynote speakers were each allocated 30-45 minutes to address their speeches. Then, in the oral presentations, the excellent papers we had selected were presented by their authors one by one. We are glad to share with you that we've selected a bunch of high-quality papers from the submissions and compiled them into the proceedings after rigorously reviewing them. These papers feature but are not limited to the following topics: Computer Art, Visual Design, Digital Media, Innovative Technology, etc. All the papers have been checked through rigorous review and processes to meet the requirements of publication. We would like to acknowledge all of those who supported ADDT 2023 and made it a great success. In particular, we would like to thank the European Alliance for Innovation (EAI) for the hard work of all its colleagues in publishing this paper volume. We sincerely hope that the ADDT 2023 turned out to be a forum for excellent discussions that enable new ideas to come about promoting collaborative research.

RENDOW YEE has been an architecture educator for more than twenty years. He is a former Chair of the Architecture Department at the City College of San Francisco. The encyclopedic scope of Mr. Yee's work is perhaps its most attractive attribute, from fairly esoteric subjects such as descriptive geometry to the most current themes such as 3D modeling. It is rich in ideas and examples.

R. R. Davison, Jr., Associate Professor of Architecture, Texas A.M. University. The book brings a rich variety of multicultural information into one volume: national and international architects' projects, simple and complex building typologies, and both low-tech and high-tech design examples. It is instructive and informative at the same time.

Hiro Hata, AIA Associate Professor of Architecture, State University of New York at Buffalo. Architectural Drawing is a comprehensive and stimulating catalog of delineation techniques with step-by-step methods for constructing each kind of drawing. Examples are clearly presented and grouped in chapters according to drawing type. This book is a useful communication tool that has become a valuable part of my professional library.
