

## Careers in Agriculture

What do you want to be when you grow up? Maybe a doctor who saves lives? What about a mechanic who works on trucks, a scientist researching a cure, or even a writer looking for his or her next story?

Did you know that all those careers, and many, many more can be in agriculture?

Before we go any further, let's define the word "agriculture." **Agriculture** describes the practice of growing crops or raising animals to make the food and many other things that humans need to survive. It's the most important industry in the world! An **agriculturalist** is someone who works in agriculture. While you may only think of farmers or ranchers when you read that definition, there are thousands more jobs that are involved in getting food from the farm to your dinner plate.

For example, the number of people who work with farmers is staggering! Here's just a few... a loan officer who works in the bank can loan money to the farmer for planting crops. A salesperson can sell the farmer the seeds to plant that will grow into the crop. A soil scientist will give the farmer advice on how to best care for the soil where the crops grow. An

entomologist is a scientist who can identify the good and bad insects on the farmer's crops. An information technology (IT) specialist might help the farmer set up a sprinkler irrigation system so it can be run from an app on a smart phone. And finally, a truck driver can haul the harvested crop from the farmer's field to the local receiving grain elevator.

The opportunities are endless! The best part is, even if you grow up with no experience with raising animals or growing plants, YOU can work in agriculture. Keep reading to learn more about the many unique and exciting careers that might interest you!
