The Public Manager Case Book Terrel L. Rhodes, 2002-07-19. As academic disciplines, public administration and public policy programs have struggled to link theoretical and conceptual grounding with practical application. Students often have discrete courses in human resources, finance, organizational behavior, policy analysis, and planning, but rarely are they offered an opportunity to pursue these through actual cases and problems facing public managers. *The Public Manager Case Book* is a collection of eight public administration cases that allows students to practice the decision-making skills they will need in their jobs as public managers. Each case focuses on the local administrative issues managers most often face in their day-to-day responsibilities, and each encourages students to collaborate with others in order to gain the necessary cooperation and information. The cases are multi-dimensional and challenge students and professors to draw from a variety of knowledge areas to develop alternative recommendations, decisions, or actions. An instructor's manual is available for useful background material, references, theoretical and conceptual framework, and teaching tips.

About the Editor: Terrel L. Rhodes is Professor of Public Administration and Vice Provost for Curriculum and Undergraduate Studies at Portland State University.

Mass Customization Strategies Klaus Moser, 2007. Mass customization is a business concept for every organization. Mass customization is not simply understood as a business strategy but also as a concept for supporting other business goals, such as the operation of a mass or craft manufacturing business. This book presents seven different mass customization strategies and the competencies needed to successfully implement these strategies. The findings presented with this book and doctoral dissertation are derived from case study research. The book documents 14 mass customization case studies and presents a new form of case study research: the industry research group. *Mass Customization Strategies* is recommended for researchers in the field of mass customization and customer integration, as well as for managers and consultants. The author, Klaus Moser, is a Project Leader at Boston Consulting Group (BCG) and a research affiliate of the TUM Research Centre for Mass Customization.
