elite coach and exercise physiologist Steve Magness integrates the latest research with the training processes of the world's best runners to deliver an in-depth look at how to maximize your performance. It is a unique book that conquers both the scientific and practical points of running in two different sections. The first is aimed at identifying what limits running performance from a scientific standpoint. You will take a tour through the inside of the body, learning what causes fatigue, how we produce energy to run, and how the brain functions to hold you back from super-human performance. In section two, we turn to the practical application of this information and focus on the process of training to achieve your goals. You will learn how to develop training plans and to look at training in a completely different way. *The Science of Running* does not hold back information and is sure to challenge you to become a better athlete, coach, or exercise scientist in covering such topics as: What is fatigue? The latest research on looking at fatigue from a brain-centered view. Why VO₂max is the most overrated and misunderstood concept in both the lab and on the track. Why zone training leads to suboptimal performance. How to properly individualize training for your own unique physiology. How to look at the training process in a unique way in terms of stimulus and adaptation. Full sample training programs from 800m to the marathon.

Adventure Running Jerry Schad, 1983

Science and Application of High-Intensity Interval Training Laursen, Paul, Buchheit, Martin, 2019. The popularity of high intensity interval training (HIIT) which consists primarily of repeated bursts of high intensity exercise continues to soar because its effectiveness and efficiency have been proven in use by both elite athletes and general fitness enthusiasts. Surprisingly few resources have attempted to explain both the science behind the HIIT movement and its sport-specific application to athlete training. That's why *Science and Application of High Intensity Interval Training* is a must-have resource for sport coaches, strength and conditioning professionals, personal trainers, and exercise physiologists, as well as for researchers and sport scientists who study high intensity interval training.

The Competitive Runner's Handbook Bob Glover, Pete Schuder, 1983. Includes sample workouts, training tips, and racing strategies, as well as good charts and tables with race pace splits.

Jim Fixx's Second Book of Running James F. Fixx, 1980. Presents information and advice on the benefits and techniques of running, covering training routines, equipment, diet, marathons, and other subjects.

Galloway's Book on Running Jeff Galloway, 1984. An approach to running describing how to prepare for races and to avoid stress-related injuries, and to help the runner get started comfortably and with confidence.
