**Cardiovascular Disorders**, 1994 *Medical and Health Related Sciences Thesaurus* National Institutes of Health (U.S.), 1985 Indexing terms used in CRISP Computer Retrieval of Information on Scientific Projects and in Research grants index Alphabetical arrangement Cross references under terms *Manual of Cardiovascular Disease in Women* Angela H.E.M. Maas, Eva Gerds, 2024-09-27 This manual defines sex and gender differences in cardiovascular disease and how they have become an important topic within most subspecialties in the field of cardiology It is now evident that sex differences in biology and lifestyle influence the pathophysiology of heart disease Consequently risk factors for cardiac disease are modified by sex and gender and women and men develop partly different variants of the same heart diseases These facts profoundly influence prevention and management in clinical practice Good medical practice demands a more tailored and personal care for each individual patient In addition the life course of women has a few unique phases related to hormonal changes in pregnancy and after menopause that also interact with individual risk and the development of co morbidities As heart disease is now the number one cause of death in women worldwide a more specific attention to cardiovascular disease in women is justified Most important advances in gender specific knowledge are related to ischemic heart disease and its traditional and sex specific risk factors Diagnostic pathways have changed coronary angiography is no longer the gold standard that it used to be Recent guidelines and position papers have paid attention to these new insights whereas educational programs urgently need to be adapted The ongoing paradigm shift in cardiology needs to be updated for the clinician in an easy and accessible manner Other important topics in which sex and gender differences have been elaborated are heart failure atrial fibrillation aortic valve disease and its treatment cardiac rehabilitation co morbidities cardiotoxicity in cancer treatment and neurology In addition female specific risk factors and socio economic factors are relevant to women s cardiovascular health We will invite the best EU experts in this field to contribute to the various chapters *Manual of Cardiovascular Disease in Women* has an educational role for established cardiologists and vascular specialists in training nurses and other allied professionals It represents an update on the most recent insights in sex and gender differences in cardiovascular health with a focus on women s cardiovascular diseases Additional questions via app Download the Springer Nature Flashcards app for free and use exclusive additional material to test your knowledge **CRISP Thesaurus**, 1989 **Cardiovascular Diseases and Disorders Sourcebook** National Institutes of Health (U.S.), 1995 Basic Information about Cardiovascular Diseases and Disorders Featuring Facts about the Cardiovascular System Demographic and Statistical Data Descriptions of Pharmacological and Surgical Interventions Lifestyle Modifications and a Special Section Focusing on Heart Disorders in Children **Cardiovascular Disorders and Behavior** D. S. Krantz, A. Baum, J. E. Singer, Jerome L. Singer, 2013-10-31 First published in 1983 This is Volume III of the Handbook of Psychology and Health Cardiovascular diseases are arguably the largest cause of death in the United States This statement attests to the importance of understanding these disorders in

order to be able to prevent ameliorate and reduce the devastation which this set of diseases can cause Cardiovascular disorders have also been the most intensely studied of those health hazards that have come to the attention of behavioral scientists The many ways in which these problems are influenced by environmental social and behavioral factors have provided a fertile ground for study by investigators of many disciplines and persuasions For these two reasons it is appropriate that a volume in this series be directed toward the study of cardiovascular disease

*Cardiovascular Diseases and Disorders Sourcebook* Sandra J. Judd,2005 Basic Consumer Health Information about Heart and Vascular Diseases and Disorders Such as Angina Heart Attacks Arrhythmias Cardiomyopathy Valve Disease Atherosclerosis and Aneurysms with Information about Managing Cardiovascular Risk Factors and Maintaining Heart Health Medications and Procedures Used to Treat Cardiovascular Disorders and Concerns of Special Significance to Women Along with Reports on Current Research Initiatives a Glossary of Related Medical Terms and a Directory of Sources for Further Help and Information Conference on Cardiac Disorders and Commercial Drivers. Final Report S. M. Fox,1987 Cardiovascular Disease in the Elderly Franz H. Messerli,2012-12-06 That geriatric cardiology has become a science and clinical discipline in its own rights is beyond dispute Most cardiac disorders present with different symptoms and signs require a different diagnostic and therapeutic approach and also have a different prognosis in the elderly as compared to younger patients Cardiovascular Disease in the Elderly provides a comprehensive up to date guide to the physician representing a pioneering work in this increasingly complex area For this third edition most of the chapters have been completely rewritten some by different authors Four new chapters have been added dealing with cardiac transplantation invasive cardiovascular procedures dietary considerations and ethical considerations It cannot be denied that invasive procedures and transplantation are highly controversial in this area and the ethical dilemmas involved are ably discussed by Dr Davis and associates All chapters are supplied with a thorough list of references making this third edition of Cardiovascular Disease in the Elderly the most thorough concise guide for the practicing physician

**Cardiovascular Diseases in the United States** Iwao Milton Moriyama,Dean E. Krueger,Jeremiah Stamler,1971 Cardiovascular diseases kill and disable more than a million Americans each year The major types of this complex of diseases are coronary heart disease hypertensive disease cerebrovascular diseases rheumatic heart disease and congenital malformations of the circulatory system Authors Moriyama Krueger and Stamler relate each of these types to etiology age of patient at onset clinical course and socioeconomic impact on the population For each type of cardiovascular disease they analyze the quantitative data on the incidence prevalence and levels and time trends of mortality and on the demographic characteristics of person affected They also examine international differences in levels and trends in mortality and point out areas for further research More than thirty five figures as well as extensive tables document their text Studies on Cardiovascular Disorders Heinrich Sauer,Ajay M. Shah,Francisco R. M. Laurindo,2010-09-11 This collection of articles on oxidative stress in clinical practice surveys essential current research in what is a rapidly evolving

field As well as giving the reader a mechanistic overview of how oxidative stress affects cardiovascular disease it analyzes the potential of a number of therapeutic options that target these pathways Understanding the complexity of the cellular redox system could lead to the development of better targeted interventions that facilitate patient recovery Even as large scale clinical trials of so called simple antioxidant approaches such as vitamins C and E show that significant benefits for cardiovascular patients remain elusive Studies on Cardiovascular Disorders demonstrates that such approaches are too simplistic Beginning with a summary of redox signaling models that could induce the progression of redox associated cardiovascular disorders the volume moves on to examine redox mediated protein modification under physiological and pathophysiological conditions It provides an outline of the signaling pathways in cardiovascular development during embryogenesis and what impact these might have in the differentiation process of resident cardiac and blastocyst derived stem cells Further chapters detail our current knowledge of the influence the sensory nervous system exerts on the cardiovascular system and the paradoxical role of mitochondria derived ROS in cardiac protection In all almost 30 contributions cover issues as diverse as the antioxidant properties of statins in the heart and the oxidative risk factors for cardiovascular disease in women A range of medical practitioners will find the contents of Studies on Cardiovascular Disorders provides illuminating insight into the Janus faced role of ROS in the cardiovascular system
