## Care Of Individuals With Cancer:

Cancer Care for the Whole Patient Institute of Medicine, Board on Health Care Services, Committee on Psychosocial Services to Cancer Patients/Families in a Community Setting, 2008-03-19 Cancer care today often provides state of the science biomedical treatment but fails to address the psychological and social psychosocial problems associated with the illness This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients Psychological and social problems created or exacerbated by cancer including depression and other emotional problems lack of information or skills needed to manage the illness lack of transportation or other resources and disruptions in work school and family life cause additional suffering weaken adherence to prescribed treatments and threaten patients return to health Today it is not possible to deliver high quality cancer care without using existing approaches tools and resources to address patients psychosocial health needs All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services Cancer Care for the Whole Patient recommends actions that oncology providers health policy makers educators health insurers health planners researchers and research sponsors and consumer advocates should undertake to ensure that this standard is met **Taking Time**, 1990 **Handbook of Oncology Social Work** Grace Hyslop Christ, Carolyn Messner, Lynn C. Behar, 2015 This inaugural Handbook of Oncology Social Work Psychosocial Care for People with Cancer provides for the first time a repository of the breadth and scope art and science of oncology social workers practice education research policy and program leadership in the psychosocial care of people with cancer and their families Medical Care of Cancer Patients Sai-Ching Jim Yeung, Carmen P. Escalante, Robert F. Gagel, 2009 Recent therapeutic advances in cancer treatment indicate that cancer is becoming a chronic disease rather than a killer This comprehensive text is the first to define and address the broad spectrum of acute and chronic internal medicine disorders that occur in cancer patients and cancer survivors as side effects of the disease itself or of the treatment regimens The authors cover nononcologic aspects of internal medicine such as anorexia obesity bone loss diabetes depression pain fatigue congestive heart failure skin disorders and pneumonia This book is conceived as a companion to standard internal medicine and oncology texts a comprehensive reference resource for internists caring for cancer patients and oncologists in practice The text is extensively indexed for easy access and retrieval of information The Multidisciplinary Care of Cancer Patients European Health Committee, 1992 **Managing care pathways for patients with complex care needs** Magdalena Smeds, 2019-05-15 One of the central challenges for the healthcare system today is how to manage care for patients with complex needs This patient group is not well defined but covers patients with serious diseases and comorbidities or with a limited ability to perform basic daily functions due to physical mental or psychosocial challenges This group has a high service and resource utilisation resulting in high costs for the healthcare system and typically poor health outcomes To improve care for these patients it is necessary to implement strategies to manage the

differentiated care needs the additional support needs the uncertainty in care delivery and the coordination needs of the involved providers and the patient Care pathways are increasingly used internationally to make care more patient centred and to structure and design care processes for individual patient groups Important elements in care pathways include structuring care activities by defining their content and sequence coordinating between providers and professionals and involving patients in their care process In this thesis care pathways are proposed as the overall strategy for managing care for patients with complex care needs The purpose of this thesis is thus to contribute with knowledge on how care pathways can be managed for patients with complex care needs This is achieved by analysing how the practices coordination standardisation customisation and personalisation can support management of care pathways and by discussing how these practices influence quality of care The quality of care dimensions discussed are accessible timely equitable and patient centred care The empirical context in this thesis is the Standardised Cancer Care Pathways CCPs which were implemented in Sweden from 2015 to 2018 CCPs is the umbrella term for the national initiative to shorten waiting times decrease regional differences and reduce fragmentation in care processes CCPs include elements such as diagnosis specific pathways and guidelines introduction of CPP coordinators and mandatory reporting of waiting times Focus has been on implementing care pathways for 31 cancer diagnoses in all Swedish healthcare regions Both qualitative and quantitative research methods have been used A case study was conducted to examine standardised and customised care pathways and coordination and multidisciplinary work in care pathways A document study of regional reports on CCPs was analysed to study effects of care pathways on accessibility timeliness and equitability Finally a national survey was conducted to deepen the understanding of the role of coordination as performed by coordinators in care pathways This thesis argues that standardised and customised care pathways should be combined to manage care for patients with complex care needs The customised pathway in particular benefits patients with serious unspecific symptoms unknown primary tumour or more complex care needs while patients with care needs that can be treated independently of the main diagnosis benefit from following a standardised care pathway Coordinators are an important means to manage coordination customisation and personalisation in the care pathway The coordinators role is twofold the first role is to manage care pathways by customising the care pathway and coordinating involved providers the second role is to support and guide patients through the care pathway This can be achieved by adapting interpersonal communication with patients through personalisation This thesis further argues that care pathways have most potential to positively influence accessibility timeliness equitability and patient centredness Accessibility has been positively influenced especially for patients with ambiguous symptoms where symptoms indicating cancer have improved their chances of accessing cancer diagnostics A negative aspect of prioritising patients who follow CCPs has been the potentially longer waiting times for other patient groups in equal need of urgent care Notwithstanding prioritised access to care is perceived to positively influence timeliness for patients following CCPs Care pathways are perceived to have

positively influenced patient centredness by shifting the focus from what to deliver to how to deliver it Taking Time National Cancer Institute (U.S.). Office of Cancer Communications,1985 This book is written for those affected by cancer Letters conversations books and articles from with and by cancer patients families and friends were used The observations of professionals who work with cancer patients as expressed in conferences seminars and journals certainly have been explored The main emphasis though is on what the people who live with cancer in their own lives and their own homes think feel and do to cope with the disease Introduction *Handbook of Community Cancer Care* Mark N. Gaze,Mark Gaze,Isobel M. Wilson,2003-01-04 An authoritative handbook covering the management of all types of cancer with an emphasis on those aspects of care of the cancer patient which are of particular interest in the community for example the presentation of cancer and palliative care The specialist management of different types of cancer is also covered with particular regard being paid to the requirements of shared care in the community and the supportive care needed for the treatment of side effects and complications Healing and Cancer Wayne B. Jonas,Alyssa McManamon,2024-04-23 Healing and Cancer strives to bring the concepts of healing and whole person care further into health care delivery so that people with cancer feel better and live longer This important book places the concepts science delivery tools and access to further resources for whole person care into the hands of cancer care teams for use with patients and caregivers These days cancer care generally focuses on attacking and killing the cancer cell a laudable goal However if eliminating the tumor overshadows everything else teams can lose sight of the care and healing of the person as a whole This has great costs for the person there are costs in time money side effects and fear and for the care team there are costs in the joy of practice the energy to improve practice and in overall vitality Often key patient needs are inadvertently pushed to the background for lack of time tools and resources Moral injury and human suffering ensue Advances in science have now clearly demonstrated that cancer does not develop in isolation and its occurrence progression and regression are largely influenced by the surrounding environment the immune system inflammation in the body and things we ingest and are exposed to By utilizing the methodologies and concepts outlined in this book oncology teams can bring the full science of cancer biology into the care of the patient while inviting the person into full engagement in their own care Doing so they will have achieved the highest quality of care for people diagnosed with cancer Care teams that practice deep listening up front and early on to patients as people move beyond patient centered care to person centered and whole person care With increasing numbers of survivors of cancer and the intensity and duration of relationships in oncology cancer care is a field uniquely positioned to further the uptake of whole person care and to join colleagues in primary care who are doing the same Healing and Cancer first defines what whole person cancer care is and drawing on examples from around the world illustrates how and why it needs to be standard in all of oncology The authors describe the science behind whole person care and the evidence that supports its application including real world examples of how it s being done in small clinics and large institutions both academic and community based Finally Healing and Cancer

directs readers to the best tools and resources available so that cancer care teams primary care clinicians integrative practitioners and those with cancer can incorporate whole person care into the healing journey Healing and Cancer is intended to be read and actively used by teams caring for people with cancer and by caregivers and patients themselves to enhance healing health and wellbeing Cancer Nursing Jessica Corner, Christopher D. Bailey, 2009-03-16 The needs of cancer patients and their families are complex Yet still more complex are the powerful social and cultural forces that shape the delivery of cancer care and the way in which it experienced Cancer Nursing Care in Context addresses this by adopting a unique approach that situates cancer care in the context of society's attitudes to the disease and the broader everyday needs of both patients and their carers By combining evidenced based information a critical view of care and treatment and first hand accounts of having cancer and caring for people with cancer the book provides a new perspective how best to deliver the care that patients truly require This second edition includes new chapters on prevention diagnosis symptoms self help and self management and living with cancer long term It also Addresses significant changes in cancer care including expansion of nursing roles the establishment of cancer networks and cancer collaborative projects Considers NICE guidance on Supportive and Palliative care Incorporates material on prevention and early detection Includes evidence tables based on relevant literature Cancer Nursing Care in Context is an invaluable resource for all those involved in the provision of cancer care and support to patients and their families **Principles and Practice of Palliative Care and Support Oncology** Ann Berger, Joseph F.
