manufacturing industry that focuses on quality design and products in fact design represents one of the country's strategic economic resources. Its good fortune and niche position on the international stage and world markets is primarily due to the system that has gradually been developed. The system unites design culture and production which are influenced on the one hand by the still unrivalled works of the past for example those by Leonardo da Vinci and on the other by the vision of a future that goes beyond mere technique and the exploitation of natural resources. The exhibition 100 Objects of Italian Design organised by the curator of the Collection Silvana Annicchiarico uses the objects that have made Italian design famous all over the world to tell this story. The exhibition is a way to discover the history of a country which thanks to its creativity and design is once again a leader on the world stage a role it intends to pursue and develop by welcoming all and every contribution.
