holds that the motivational face of desire presents its unique essence to desire a state of affairs is to be disposed to act so as to bring it about A familiar but less standard account holds the hedonic face of desire to reveal to true nature of desire In this view to desire something is to tend to pleasure if it seems that the desired state of affairs has been achieved or displeasure if it seems otherwise thus tying desire to feelings instead of actions In Three Faces of Desire Schroeder goes beyond actions and feelings to advance a novel and controversial theory of desire that puts the focus on desire s neglected face reward Informed by contemporary science as much as by the philosophical tradition Three Faces of Desire discusses recent scientific discoveries that tell us much about the way that actions and feelings are produced in the brain In particular recent experiments reveal that a distinctive system is responsible for promoting action on the one hand and causing feelings of pleasure and displeasure on the other This system the brain s reward system is the causal origin of both action and feeling and is the key to understanding the nature of desire
