Caring Cook:

Image and Power Sarah Sceats, Gail Cunningham, 2014-09-11 Image and Power is an important work of literary and cultural criticism. This collection of essays focuses on some of the major issues addressed by women's writing in the twentieth century concerning genre, subjectivity, and social and cultural expectations, issues which in the past have been regarded from an essentially male perspective. The text introduces women writers whose novels have been widely read and provides an important contribution to the debate about women in literature.

[Dottie's Daring Day](#) Meg Welch Dendler, 2018-06-30 Dottie didn't mean to run away. But when she accidentally slipped out of her collar on the Razorback Greenway Trail during a Saturday walk, she began a day of adventure exploring the town and the University of Arkansas campus. Along her journey, she meets new friends and even learns how to Call the Hogs. She always planned to be home before dark, but will she still be able to find the way back to her girl Mindy when her daring day is done? Dottie's Daring Day is a companion book to the best-selling award-winning *Cats in the Mirror* Series and a sequel of sorts to the 1 best-selling dog adventure story *Max's Wild Night*.

Machine Medical Ethics Simon Peter van Rysewyk, Matthijs Pontier, 2014-09-05 The essays in this book, written by researchers from both humanities and science, describe various theoretical and experimental approaches to adding medical ethics to a machine: what design features are necessary in order to achieve this, philosophical and practical questions concerning justice, rights, decision making, and responsibility in medical contexts, and accurately modeling essential physician-machine-patient relationships. In medical settings, machines are in close proximity with human beings with patients who are in vulnerable states of health, who have disabilities of various kinds, with the very young or very old, and with medical professionals. Machines in these contexts are undertaking important medical tasks that require emotional sensitivity, knowledge of medical codes, human dignity, and privacy. As machine technology advances, ethical concerns become more urgent: should medical machines be programmed to follow a code of medical ethics? What theory or theories should constrain medical machine conduct? What design features are required? Should machines share responsibility with humans for the ethical consequences of medical actions? How ought clinical relationships involving machines to be modeled? Is a capacity for empathy and emotion detection necessary? What about consciousness? This collection is the first book that addresses these 21st-century concerns.
