*Algorithmic Problems in Groups and Semigroups* Jean-Camille Birget, Stuart Margolis, John Meakin, Mark V.

Sapir, 2012-12-06 This volume contains papers which are based primarily on talks given at an international conference on Algorithmic Problems in Groups and Semigroups held at the University of Nebraska Lincoln from May 11 to May 16, 1998. The conference coincided with the Centennial Celebration of the Department of Mathematics and Statistics at the University of Nebraska Lincoln on the occasion of the one hundredth anniversary of the granting of the first Ph.D. by the department. Funding was provided by the US National Science Foundation, the Department of Mathematics and Statistics, and the College of Arts and Sciences at the University of Nebraska Lincoln through the College's focus program in Discrete, Experimental, and Applied Mathematics. The purpose of the conference was to bring together researchers with interests in algorithmic problems in group theory, semigroup theory, and computer science. A particularly useful feature of this conference was that it provided a framework for exchange of ideas between the research communities in semigroup theory and group theory, and several of the papers collected here reflect this interaction of ideas. The papers collected in this volume represent a cross section of some of the results and ideas that were discussed in the conference. They reflect a synthesis of overlapping ideas and techniques stimulated by problems concerning finite monoids, finitely presented monoids, finitely presented groups, and free groups.

Mathematical Software - Proceedings Of The First International Congress Of Mathematical Software Arjeh M. Cohen, Xiaoshan Gao, Nobuki Takayama, 2002-07-26 The advent of mathematical software has been one of the most important events in mathematics. Mathematical software systems are used to construct examples to prove theorems and to find new mathematical phenomena. On the other hand, mathematical research often motivates developments of new algorithms and new systems. This volume contains the papers presented at the First International Congress of Mathematical Software, which aimed at a coherent study of mathematical software systems from a wide variety of branches of mathematics. The book discusses more than one hundred mathematical software systems. Readers can get an overview of the current status of the arts of mathematical software and algorithms. The proceedings have been selected for coverage in *Index to Scientific Technical Proceedings*, *ISTP CDROM version*, *ISI Proceedings*.
