Destination Moon:

Destination Moon Rod Pyle,2005-11-01 The Apollo space program was the largest technological undertaking of all time and led to the greatest adventure of the 20th century Born of the cold war it was moved forward by the passion of 100 000 workers and 20 billion over ten years Over that time 12 courageous individuals stepped out onto the lunar surface and thus changed the history of humankind changing us into a space faring civilization And then it was gone Three years 9 missions six men on the surface of the moon They explored they experimented and they came home Here in one volume are the transcribed voices of the participants with expert commentary and retrospective reminiscences explained and put into context From the triumphs of Neil Armstrong to Buzz Aldrin to the near disaster of Apollo 13 Houston we've got a problem it's all here the science the adventure the glory the letdown One of the great stories of humankind's reaching for the stars

Coming Soon Keith M. Johnston,2009-09-12 The audience's first exposure to a new movie is often in the form of a coming attraction trailer and short previews are also a vanguard for emerging technology and visual techniques This book demonstrates how the trailer has educated audiences in new film technologies such as synchronized sound widescreen and 3 D tracing the trailer's status as a trailblazer on to new media screens and outlets such as television the Internet and the iPod The impact and use of new technologies and the evolution of trailers beyond the big screen is followed into the digital era

An Army of Phantoms J. Hoberman,2013-01-29 The film critic's sweeping analysis of American cinema in the Cold War era is both utterly compulsive reading and majestic in its breadth and rigor Film Comment An Army of Phantoms is a major work of film history and cultural criticism by leading film critic J Hoberman Tracing the dynamic interplay between politics and popular culture Hoberman offers the most detailed year by year look at Hollywood during the first decade of the Cold War ever published one that takes film analysis beyond the screen and sets it in its larger political context Los Angeles Review of Books By telling the story not just of what's on the screen but of what played out behind it Hoberman demonstrates how the nation's deep seated fears and wishes were projected onto the big screen In this far reaching work of historical synthesis Cecil B DeMille rubs shoulders with Douglas MacArthur atomic tests are shown on live TV God talks on the radio and Joe McCarthy is bracketed with Marilyn Monroe The American Scholar From cavalry Westerns to apocalyptic sci fi flicks and biblical spectacles from movies to media events congressional hearings and political campaigns An Army of Phantoms reminds you what criticism is supposed to be revelatory reflective and as rapturous as the artwork itself Time Out New York An epic alternately fevered and measured account of what might be called the primal scene of American cinema Cineaste There's something majestic about the reach of Hoberman's ambitions the breadth and rigor of his research and especially the curatorial vision brought to historical data Film Comment

Watching the Skies! Bill Warren,2009-11-30 Bill Warren's *Keep Watching the Skies* was originally published in two volumes in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs, many rare, 35 in color, has seven useful appendices, and concludes with an enormous index. This book is also available in softcover format. ISBN 978 1 4766 6618 1

Escape Velocity Bradley Schauer,2017-01-03 Today movie theaters are packed with audiences of all ages marveling to exciting science fiction blockbusters, many of which are also critically acclaimed. However, when the science fiction film genre first emerged in the 1950s, it was represented largely by exploitation horror films, lurid, culturally disreputable, and appealing to a niche audience of children and sci-fi buffs. How did the genre evolve from B movie to blockbuster? *Escape Velocity* charts the historical trajectory of American science fiction cinema, explaining how the genre transitioned from eerie, low-budget horror like *It Came from Outer Space* to art films like *Slaughterhouse Five* and finally to the extraordinary popularity of hits like *E.T.* Bradley Schauer draws on primary sources such as internal studio documents, promotional materials, and film reviews to explain the process of cultural, aesthetic, and economic legitimation that occurred between the 1950s and 1980s as pulp science fiction tropes were adapted to suit the tastes of mainstream audiences. Considering the inescapable dominance of today's effects-driven blockbusters, *Escape Velocity* not only charts the history of science fiction film but also gives an account of the origins of contemporary Hollywood.

100 Science Fiction Films Barry Keith Grant,2017-10-12 A comprehensive guide to science fiction films which analyzes and contextualizes the most important examples of the genre from *Un voyage dans la lune* (1902) to *The Road* (2009).

Man and the Moon Robert Shirley Richardson,1961 A scientific guide for the layman in which various experts tell about the moon and man's plans to visit it. Illustrated in black and white and color by Chesley Bonestell. *Town Journal*, 1929
