Students at Risk of School Failure José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g

coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates

New Media and Perennial Problems in Foreign Language Learning and Teaching Liliana Piasecka, Małgorzata Adams-Tukiendorf, Przemysław Wilk, 2014-11-28 The book concerns the ways in which the new media shape communication along with educational expectations and practices in foreign language classrooms Although foreign language learners have cheap and easy access to information and ways of communication they also wrestle with problems that have always accompanied language learning The focus of the book is two fold On the one hand the authors demonstrate how using social networks videoconferencing mobile phones wikis and computer mediated interaction contributes to the development of language skills negotiated interaction autonomy and intercultural competence On the other they discuss old issues pertaining to the role of vocabulary corrective feedback textbooks and inner speech in the process of language learning and use Every chapter reports original empirical research on issues related to the new media and old problems in foreign language teaching contexts in various countries and with respect to various age groups

Developing Writing Skills David James, 2016-11-12 This book aims to broaden the reader's interest in language as an essentially human activity and as an art form However it is less concerned with encouraging creative writers than in sharpening sensitivity to the billions of words and word combinations that surround us Of the four language skills listening speaking reading and writing writing is the most difficult It is also the skill by which we are often judged by others as worthy to proceed to higher learning say or to be interviewed for a post of special responsibility It is the sector that causes most anxiety for pupils and parents As an essentially self help guide this book may be used as a supplement to regular classes however it is predominantly a stand alone manual that eschews regular drills and places the onus on the student to question our use of written and spoken words Each of the 60 or so one page chapters simply outlines the topic and follows this with a To Do section with no answers The student will realise that language is arbitrary and that he/she is the final judge

Developing Writing Skills is not merely about getting you through exams but encouraging an interest in language for life It is a practical book but not a grammar book it encourages you to read widely and choose your words with care to expand your word store to write continually and self critically and learn to take a pride in a sentence Students may look askance at the latter because schools are essentially market orientated encouraging performance through various stages and obsessed by league tables and university places Life does not begin with a first class honours degree and end with a career as a heart surgeon or a barrister it begins and ends with an attempt to grapple with language sounds and later its accompanying marks on paper rather than marks in a teacher's record book
