LePoire, Bulat Khusainov, 2024-12-17 This two volume book presents the challenges of the global energy transition offering a comprehensive exploration of the policies and drivers shaping the pace and trajectory of this transformation Highlighting regional development the book shows how different models and scenarios of energy transition emerge It discusses important factors such as materials and technologies shedding light on the opportunities and constraints for the energy transition Global warming and climate change influenced the change in people s consciousness and their awareness of the need for more limited use of hydrocarbon resources Changes in weather conditions rising sea levels and destructive climate events such as hurricanes forest fires droughts floods etc have become more frequent Many countries around the world reacting to

these changes have developed long term plans to actively replace fossil fuels gas oil and coal with renewable energy sources mainly solar and wind However the low replacement rates observed in the global energy sector over the past 30 years raise the question of how far the decarbonization scenarios and models being implemented by many countries bring us closer to the ultimate goal of creating an economy with a low carbon footprint Seeking answers the volumes feature 22 chapters split across the two books which in detail discuss various aspects of the energy transition and their impact on the sustainability of economic development and the future of energy This first volume Models and Regions focuses on regional disparities and economic drivers presenting case studies from different regions in 10 chapters

**Globalization and the Challenge for Developing Countries** Shahid Yusuf,2001 A comprehensive approach to globalization managed and abetted by good policies can magnify the effects of growth promoting measures

South-South Globalization S. Mansoob Murshed,Pedro Goulart,Leandro Serino,2011-06-16 Two prominent features of the current global economy are the world wide recession brought about by the recent financial crisis and the emergence of major economic powers from within the developing world such as Brazil China and India The former represents the failure of global regulatory policies and macroeconomic imbalances between surplus and deficit countries the latter is symptomatic of a partial shift in economic power towards developing nations who are often collectively labelled the global South The macroeconomic imbalances are unsustainable in the longer run as they mean greater absorption relative to income in deficit nations they require corrective action and international policy coordination Reducing imbalances also requires large developing countries to raise their domestic consumption and also imports from the rest of the world and international financial institutions to operate as a lender of last resort Furthermore the engines of global growth especially for developing countries may no longer lie solely in the traditional developed country markets in the USA Europe and Japan known collectively as the global North Rather South South trade is growing rapidly and that could be an engine of growth for the global economy including both developed and developing countries The various chapters in this edited volume address issues surrounding global imbalances and the prospects for growth in developing countries propelled by South South interaction This book should be of interest to students and researchers focussing on political economics international economics globalization global imbalance and the world wide recession after 2008

Globalization and Development Studies Frans Johan Schuurman,Sage Publications Inc.,2000 Development issues theories and policies reflected the modernity of the post WWII period Since the 1980s development studies has endured increasing critique of some of its central paradigms such as the universality of the notion of progress and the supposed homogeneity of the Third World but the current challenge of globalization is perhaps even more fundamental This book addresses the questions of how globalization has affected the various sub disciplines within the field of development studies and what it means for the future of the discipline

Social Movements in Development Staffan Lindberg,Arni Sverrisson,2016-07-27 Nationalist movements in the South have been superseded by a plethora of different

social movements This book examines these new movements and considers emerging paradigms of organization and mobilization which are related to the role movements play in economic and political development The book analyzes a number of cases and their context and discusses the implications for social movement theory The focus is on social movements among underprivileged and middle class groups and the book is global in scope
