Language Acquisition and Conceptual Development Melissa Bowerman, Stephen C.

Levinson, 2001-01-11. Recent years have seen a revolution in our knowledge of how children learn to think and speak. In this volume, leading scholars from these rapidly evolving fields of research examine the relationship between child language acquisition and cognitive development. At first sight, advances in the two areas seem to have moved in opposing directions: the study of language acquisition has been especially concerned with diversity, explaining how children learn languages of widely different types, while the study of cognitive development has focused on uniformity, clarifying how children build on fundamental, presumably universal concepts. This book brings these two vital strands of investigation into close dialogue, suggesting a synthesis in which the process of language acquisition may interact with early cognitive development. It provides empirical contributions based on a variety of languages, populations, and ages, and theoretical discussions that cut across the disciplines of psychology, linguistics, and anthropology.

Language Development James Law, Sheena

Reilly, Cristina McKean, 2022-08-25. The majority of children acquire language effortlessly, but approximately 10% of all children find it difficult, especially in the early or preschool years, with consequences for many aspects of their subsequent development and experience: literacy, social skills, educational qualifications, mental health, and employment. With contributions from an international team of researchers, this book is the first to draw together a series of new analyses of data related to children's language development, primarily from large-scale, nationally representative population studies, and to bring a public health perspective to the field. The book begins with a section on factors influencing the patterns of language development. A second section explores continuity and change in language development over time. The third explores the impact on individuals with developmental language disorders (DLD), the effectiveness of available interventions, and broader issues about the need for equity in the delivery of services to those with DLD.
