Developing Father:

The Developing Father Bryan E. Robinson, Robert L. Barret, 1986 No longer can it be assumed that women are better equipped than men to raise children Societal changes over the past few decades have broadened the range of acceptable behavior for both sexes and proficiency in tasks of parenthood is now considered to be independent of gender In keeping with this trend investigators have increasingly focused on the role of the father as a primary care giver within the family Previously neglected by researchers fathers are now being studied to determine what part they play in the development of their children and in turn how this interaction affects their own development In this volume the authors provide a comprehensive view of contemporary fathers both from the perspective of current research and through personal accounts of men describing their own parenting experiences The result is a theoretically sophisticated text with a human dimension often absent from scholarly studies of the family The first section provides an overview of different conceptualizations of fatherhood including a review of life span and family systems theory From this theoretical base the second section goes on to describe the roles of male parents in the context of today's society Covering such topics as stepfathers single fathers gay fathers teenage fathers and fathers of disabled children each chapter contains a comprehensive list of resources available to fathers as well as a practical list of suggestions for the professional who work with them Designed as a practical resource for students and professionals in the human services this unique book also serves as a supplementary text in college and graduate courses in social work education child and family development gender studies counseling and nursing Readable and comprehensive THE DEVELOPING FATHER is indispensable as a solid reference work that also provides an experiential view of the emerging role of fathers in our families and society
