symbolic and artistic worldmaking to cinema expands on French philosopher Mikel Dufrenne's phenomenology of aesthetic experience in relation to films and their worlds and addresses the hermeneutic dimensions of cinematic art. It emphasizes what both celluloid and digital filmmaking and viewing share with the creation and experience of all art while at the same time recognizing what is unique to the moving image in aesthetic terms. The resulting framework reconciles central aspects of realist and formalist neo-formalist positions in film theory while also moving beyond them and seeks to open new avenues of exploration in film studies and the philosophy of film. *Ethics Applied*, 2000. [The Self-Creating Universe](#) J.J. Clarke, 2013-08-22. The Self-Creating Universe is a wide-ranging attempt to bring science and spirituality together in a philosophical synthesis. It opens up to the reader exciting new developments in the natural sciences while also showing how these contribute to a worldview which addresses fundamental philosophical and social questions. The key concept is creativity in both nature and human life. Making use of ideas from the history of philosophy and from recent speculations in sciences including cosmology and evolution, the book offers bold conjectures about the emergence of new forms of order and self-organisation in nature, in consciousness and in human life as a whole. The book is written in an accessible style which is designed to appeal to both the general reader and to specialists interested in the wider implications of their fields.
