

DEVELOPING QUALITY MANAGEMENT AND LEADERSHIP IN SOUTH AFRICAN SCHOOLS

BH Challens & CP van der Vyver (Eds)

Developing Quality Schools

RD Boyd

Developing Quality Schools:

Developing Quality Schools Colin Charles Bayne-Jardine, Peter Holly, 1994 Developing Quality Management and Leadership in South African Schools Branwen Challens, Corné Van der Vyver, 2019 Chapter 9 of the National Development Plan 2030 indicates that human capacity and school management are priorities in basic education in South Africa. The National Development Plan 2030 puts emphasis on learning and teaching as the core business of a school and acknowledges that the main responsibility of a school principal should be to lead the core business of the school. *Developing quality management and leadership in South African schools* provides clear and concise discussion of educational school management and leadership aspects in the current South African context. This textbook addresses contextual issues in the field of educational management and leadership. It inspires aspiring and practising educational school managers or leaders to rethink and enhance their management and leadership practices for the dynamic educational environment in South Africa. This textbook serves as a practical guide to equip educators with management and leadership skills. *Developing Quality Schools* Martin Barlosky, Stephen B. Lawton, Ontario Institute for Studies in Education. Dept. of Educational Administration, 1994-01-01. The purpose of this handbook is to provide a resource that will allow all participants in the educational enterprise to understand and to begin the process of quality improvement. The handbook is an initiating document intended to help the quality improvement process get under way in your school and in your school system.

Development and Implementation of a Quality Circle Programme Among Higher Secondary Teachers Ruchi Dwivedi, 2019-12-16 Project Report from the year 2019 in the subject Pedagogy General grade B course PGDBA language English abstract. The quality circle (QC) has the main aspect of volunteers who are working on it and a facilitator so that the problem can be critically analysed and the solution can also be implemented in scheduled time. QC is common at industrial level for analysing the quality of productivity in the same manner the quality can be enhanced in other institutes like educational institutes and other product bearing institutes. Here the researcher had tried to implement the quality circle programme among higher secondary teachers. The findings confirm that with the help of the rubric followed in the programme and by proper guidance they can extract out their specific problems from the bunches of the problems and categorise them and can resolve them also with the help of their own critical analysis. This implementation of the tasks given in the programme can be considered as a feasible and realistic solution with the perspective of the problems faced by them. Such interventions are directly impacting the teaching learning process and this cost-effective affair can be a boon for the quality education. Education is as old as humanity. It is a never-ending process of inner growth as well as development and its period stretches from the cradle to the grave. The Education Commission 1964-66 described the role of education in social and economic transformation through a statement: the density of a nation is shaped in its classrooms. Higher Secondary Education provides specialized knowledge and skilled persons for national development. One of the major objectives of teacher

education is to develop proper attitudes towards teaching as a result of which he was able to maximize the achievements from both the material and human resources There is also the development of a proper perception of the problems of universal enrolment regular attendance and year to year promotion
