Development Geography:

Making Development Geography Victoria Lawson, 2014-03-18 *Making Development Geography* is a timely new book which introduces readers to the major themes and debates in development geography. It argues cogently that the field is engaged in an ongoing process of reinventing itself as critical development geography and highlights issues such as identity, globalization, social movements, and sexuality. Readers are guided through the key concepts and developments of the last 50 years, surveying the themes of Keynesianism, Marxism, and post-colonialism. At the same time, each chapter uses international examples to discuss important contemporary issues so that the real-world applications of theory can be understood. This enlightening book offers a comprehensive introduction to the fundamental debates for anyone with an interest in development issues.

Key Concepts in Development Geography Rob Potter, Dennis Conway, Ruth Evans, Sally Lloyd-Evans, 2012-05-17 An excellent and supremely accessible guide to some key issues in development geography. Stuart Corbridge, London School of Economics. Provides a clearly stated, informed, and strongly structured pathway through the key literatures and debates. Jonathan Rigg, Durham University. Organized around 24 short essays. *Key Concepts in Development Geography* is an introductory text that provides students with the core concepts that form contemporary research and ideas within the development geography discipline. Written in a clear and transparent style, the book includes an introductory chapter providing a succinct overview of the recent developments in the field, over 24 key concept entries that provide comprehensive definitions, explanations, and evolutions of the subject, excellent pedagogy to enhance students' understanding, including a glossary, figures, diagrams, and further reading. Organized around five of the most important areas of concern, the book covers the meanings and measurement of development, its theory and practice, work, employment, and development, people, culture, and development, and contemporary issues in development. The perfect companion for undergraduate and postgraduate students on geography degrees, the book is a timely look at the pressingly important field of international development studies today.

Written to stimulate critical thought and discussion about development, it does not assume any clear-cut distinction between developed and developing parts of the world. Case studies highlight the problems and possible solutions at local, national, and international scales. These include food production in Senegal, Disney in China, Hurricane Mitch in Honduras, corruption in Bulgaria, further studies from Russia, Bangladesh, and Vietnam. *Development Geography* is the fifth book to be published in the popular modular text series *Routledge Contemporary Human Geography*.
