Handbook of Food Additives Michael Ash, Irene Ash, 1995-01-01
The food additive industry is growing at a rapid pace. Consumers throughout the world have created an increased demand for more processed foods requiring more additive ingredients and healthier foods requiring replacements for fats and sugars. This has triggered a need for the development of food chemical additives that can produce more specialized effects. For example, as fat is reduced in food products, more flavour emulsifier and texturizing agents are needed to mimic its properties. Flavour and flavour enhancers are used to compensate for reduced sugar and sodium.

Food Additives Handbook Richard J. Lewis, 1989
Each additive is covered in a separate alphabetically listed entry. Entries give CAS number, properties, synonyms, use in foods, and safety profile.

Smith,2013-11-11 The aim of this book is to present technical information about the additives used in food product development in a concise form Food product development is an activity which requires application of technical skills and the use of a diverse range of information Normally this information is scattered throughout the vast food science

literature in journals and books and in technical publications from the various suppliers It has been my experience through consulting with the food industry that there is a need for information on food additives in a quick to use form in tables and figures where possible Time wasted during information retrieval causes delay in practical development work which results in delay of product launch and possibly the loss of market advantage This handbook will be used by food product development staff and by all food scientists requiring access to information on food additives in a quick to use format Some knowledge of food science is assumed Each chapter contains a bibliography which can be consulted if further information is required Local legislation will have to be consulted to determine the legality of use of the additive in which foods and at what level of addition Information on safety can be found in Food Additives Handbook 1989 by R I Lewis published by Van Nostrand Reinhold New York
