Code Z:

Codes and Automata Jean Berstel, Dominique Perrin, Christophe Reutenauer, 2010 This major revision of Berstel and Perrin's classic Theory of Codes has been rewritten with a more modern focus and a much broader coverage of the subject. The concept of unambiguous automata which is intimately linked with that of codes now plays a significant role throughout the book reflecting developments of the last 20 years. This is complemented by a discussion of the connection between codes and automata and new material from the field of symbolic dynamics. The authors have also explored links with more practical applications including data compression and cryptography. The treatment remains self-contained; there is background material on discrete mathematics, algebra, and theoretical computer science. The wealth of exercises and examples make it ideal for self-study or courses. In summary, this is a comprehensive reference on the theory of variable length codes and their relation to automata.

B-29s Over Japan, 1944-1945 Samuel Russ Harris, Jr., 2014-01-10 This diary focuses intensely on Col. Samuel Russ Harris' life within his own 499th Bomb Group and his relationship with the 73rd Bomb Wing's operations. The first section of the book is an intimate portrait of war. To provide a context of the B-29 war against Japan, the second half of the text details how the 73rd Bomb Wing was engaged in the war against Japan. Together, the two parts provide a well-rounded portrait of America and one American at war.

Parallel and Distributed Computing: Applications and Technologies Kim-Meow Liew, Hong Shen, Simon See, Wentong Cai, Pingzhi Fan, Susumu Horiguchi, 2004-12-07 The 2004 International Conference on Parallel and Distributed Computing Applications and Technologies (PDCAT 2004) was the fifth annual conference and was held at the Marina Mandarin Hotel, Singapore, on December 8-10, 2004. Since the inaugural PDCAT held in Hong Kong in 2000, the conference has become a major forum for scientists, engineers, and practitioners throughout the world to present the latest research results, ideas, developments, techniques, and applications in all areas of parallel and distributed computing. The technical program was comprehensive and featured keynote speeches, technical paper presentations, and exhibitions showcased by industry vendors. The technical program committee was overwhelmed with submissions of papers for presentation from countries worldwide. We received 242 papers and, after viewing them based on stringent selection criteria, we accepted 173 papers. The papers in the proceedings focus on parallel and distributed computing, viewed from the three perspectives of networking and architectures, software systems, and technologies, and algorithms and applications. We acknowledge the great contribution from all of our local and international

committee members and reviewers who devoted their time in the review process and provided valuable feedback for the authors. PDCAT 2004 could never have been successful without the support and assistance of several institutions and many people. We sincerely appreciate the support from the National Grid Office and IEEE Singapore for technical co-sponsorship. The financial sponsorships from the industrial sponsors Hewlett Packard Singapore, IBM Singapore, Sun Microsystems, SANDZ Solutions, Silicon Graphics and Advanced Digital Information Corporation are gratefully acknowledged.
