## **Collaborative Circles:**

**Collaborative Circles** Michael P. Farrell, 2003-11 Many artists writers and other creative people do their best work when collaborating within a circle of likeminded friends Experimenting together and challenging one another they develop the courage to rebel against the established traditions in their field Out of their discussions they develop a new shared vision that guides their work even when they work alone In a unique study that will become a rich source of ideas for professionals and anyone interested in fostering creative work in the arts and sciences Michael P Farrell looks at the group dynamics in six collaborative circles the French Impressionists Sigmund Freud and his friends C S Lewis J R R Tolkien and the Inklings social reformers Elizabeth Cady Stanton and Susan B Anthony the Fugitive poets and the writers Joseph Conrad and Ford Maddox Ford He demonstrates how the unusual interactions in these collaborative circles drew out the creativity in each member Farrell also presents vivid narrative accounts of the roles played by the members of each circle He considers how working in such circles sustains the motivation of each member to do creative work how collaborative circles shape the individual styles of the persons within them how leadership roles and interpersonal relationships change as circles develop and why some circles flourish while others flounder *Festschrift in Honor of David R. Maines* Shing-Ling S. Chen, 2023-11-13

Highlighting the significance of Maines works in symbolic interactionism Volume 57 of *Studies in Symbolic Interaction* documents his most celebrated areas of scholarship including social structure narrative sociology social interaction dialectic perspective temporality and mesostructure **Overcrowded** Roberto Verganti, 2017-01-27 A more powerful innovation which seeks to discover not how things work but why we need things The standard text on innovation advises would be innovators to conduct creative brainstorming sessions and seek input from outsiders users or communities This kind of innovating can be effective at improving products but not at capturing bigger opportunities in the marketplace In this book Roberto Verganti offers a new approach one that does not set out to solve existing problems but to find breakthrough meaningful experiences There is no brainstorming which produces too many ideas unfiltered but a vision subject to criticism It does not come from outsiders but from one person s unique interpretation The alternate path to innovation mapped by Verganti aims to discover not how things work but why we need things It gives customers something more meaningful something they can love Verganti describes the work of companies including Nest Labs Apple Yankee Candle and Philips Healthcare that have created successful businesses by doing just this Nest Labs for example didn t create a more advanced programmable thermostat because people don t love to program their home appliances Nest s thermostat learns the habits of the household and bases its temperature settings accordingly Verganti discusses principles and practices methods and implementation The process begins with a vision and proceeds through developmental criticism first from a sparring partner and then from a circle of radical thinkers then from external experts and interpreters and only then from users Innovation driven by meaning is the way to create value in our current world where ideas are abundant but novel visions are rare If
