Environmental Perception and Human Behaviour Maurice Okon Ebong,1995 Fundamentals of Human Geography: Man & environment Open University. Media Development Group,1977 Environment and Planning A. ,1997 Human Behavior and Environment Irwin Altman,Joachim F. Wohlwill,2013-11-11 This is the first in a series of volumes concerned with research encompassed by the rather broad term environment and behavior The goal of the series is to begin the process of integration of knowledge on environmental and behavioral topics so that researchers and professionals can have material from diverse sources accessible in a single publication The field of environment and behavior is broad and interdisciplinary with researchers drawn from a variety of traditional disciplines such as psychology sociology anthropology geography and other social and behavioral sciences and from the biological and life sciences of medicine psychiatry biology and ethology The interdisciplinary quality of the field is also reflected in the extensive involvement of environmental professionals from architecture urban planning landscape architecture interior design and other fields such as recreation and natural resources

to name just a few At present the field has a somewhat chaotic flavor with research being carried out by a variety of scholars who publish in a multitude of outlets Many researchers and practitioners are unaware of the state of knowledge regarding a specific topic because of the unavailability of integrated reference materials There are only a handful of books dealing with environment and behavior most of them unintegrated collections of readings with only an occasional systematic analysis of some facet of the field
