Building, 1890 **That City is Mine!** Cordula Rooijendijk, 2025-10-01 This thesis is about urban ideal images It is about dreams not fictitious beliefs but dreams that humankind can realize tomorrow It is about images from intellectuals pastry cooks urban planners and firemen About people who deeply care about their cities about their hopes frustrations anger and optimism They describe their ideals in city debates to gain support and try to eliminate those with different urban ideal images They grouse cuddle quarrel adore allies and blacken enemies But are they successful Do people change their urban ideal images because of these discussions Does the local planning council change their plans because they conflict with ideals of citizens The answers can be found in this book The American Architect Specification Manual, 1921

European Architect Law Stéphanie van Gulijk, 2009 The legal relationship between architects and clients suffers from two basic tensions that have been debated in several European countries First the market for design of buildings is not the exclusive domain of architects anymore Other disciplines have gradually encroached on the architect's core activities Many new forms of contract have been developed in the construction industry These market models no longer fit the traditional design contract departing from the idea that an architect designs a structure that is fit for its purpose and subsequently supervises the realization of the design by the building contractor Second designing buildings is a low yield high risk endeavor If the obligations of architects under the design contract are not performed well they are exposed to severe liabilities which may cause serious financial problems Detailed comparative research on design contracts shows that rule makers have difficulties in dealing with these two tensions In Europe considerable differences exist regarding the national rules that apply to the contractual relationship between architects and clients Therefore in this study four regulation issues have been investigated that deal with establishing rules to govern the two tensions market entry regulation architect liability limitation of architect liability and professional liability insurance In order to evaluate these regulation issues a law and economics perspective is applied The book will help to establish which combination of regulation options is likely to lead to more efficient outcomes It provides insights in what is the best way to deal with the two tensions in the relationship between architects and clients and it contributes to establishing a new design for European architect law **Redwood Home Plans by California Architects** California Redwood Association, 1925 Green Fields, Brown Fields, New Fields David Nichols, Anna Hurlimann, Clare Mouat, Stephen Pascoe, 2010 The conference explores past and future approaches to managing and designing for growth development and decline This goes beyond debates over density frontier development and renewal It includes new fields of historical policy and social research which inform discussion of heritage growth
