Another Jesus, a Different Spirit, a Different Gospel Steven H. Propp,2011-12-13 Its the Christmas seasonthe most wonderful time of the year for most people in River City California But for Jehovahs Witnesses Lawrence and Brad its a time for them to try to explain the truth about this holiday season to the people of the community Their earnest efforts may earn them ridicule disagreement or a door slammed rudely in their faces but they persistand are sometimes able to find a mind and heart receptive to their urgent message about Jehovahs coming Kingdom Whereas for Elders Skousen and Marshalltwo Latter day Saint Mormon missionaries the season is another opportunity to share their Churchs distinctive interpretation of the Christian gospel but their efforts are often rebuffed as well In the course of their work these two pairs of men engage in dialogue with traditional Christians as well as members of the Church of Christ the Community of Christ RLDS Seventh day Adventists and Oneness Pentecostalsnot to mention skeptics atheists and the increasing numbers of people who lack any particular religious beliefs But when a local church brings in a researcher to give a series of lectures on Cultsand specifically targeting the Jehovahs Witnesses and Mormonsa confrontation is ensured where theological and biblical concepts collide in a public forum Who if anyone really has the Truth Can one still discover the true meaning of Christmas in the midst of passionate disagreements over the validity of the holiday season Are objections raised about the secularization and rampant commercialism of the modern celebration valid Spend a holiday season or any other season with some interesting and intellectually stimulating characters as they explore these and other challenging questions Readers of the authors earlier novel *A Multicultural Christmas* will be pleased to see a brief reappearance of two characters from that book *Principals of Dynamic Schools* Sharon F. Rallis, Ellen B. Goldring,2000-04-15 The second edition continues with Sharon Rallis and Ellen Goldring providing lively and inspiring views of school leadership that is both grounded in reality and compellingly hopeful that this reality can be redefined for the better This book packs more useful ideas about what leadership is and how it works in successfully restructuring schools than any other book now available The authors speak to this topic with a voice that is as passionate and sensitive as it is reasoned and authoritative Rallis and Goldring tell a story based on their extensive case studies and survey studies and on a through overview of the research of others They define anew what it means for principals to be in charge The principals they studied were much less concerned with controlling what people did and how they did it and much more concerned with controlling the conditions that enabled others to function in ways that increased the likelihood shared goals would be reached Rallis and Goldring describe and illustrate the behavior of these new principals and

Dynamic Economic Systems John M. Blatt, 2019-07-29

The bicentenary of The Wealth of Nations has passed and so has the centenary of the neoclassical revolution in economics Yet the present state of dynamic economic theory leaves very much to be desired and appears to show little sign of significant improvement in the near future Structured into 5 main topics the main purpose of Dynamic Economics Systems is to present arguments for this contention and to start developing the tools which are needed to make progress in understanding truly dynamic economic systems First published in 2000

Understanding Superior New Product Development Ina Horn, 2011-08-25

This book is available as Book on Demand Over the past decade many companies in the semiconductor and aerospace industries have significantly upgraded their new product development processes with disciplined timelines strict design reviews gates to decision making and cross functional collaboration Some companies are outperforming their industry peers in terms of time to market and meeting customer needs This raises the question of how companies can achieve and sustain performance based on the new product development function To answer this question the present book analyzes the new product development process with a focus on the underlying dynamic capabilities how such routines evolve on different organizational levels and what are the associated social phenomena Comparative case study evidence suggests that higher order resource reconfiguration and integration routines are established idiosyncratically It is argued that simple perception based and loosely coupled routines seem to be more effective for reconfiguring responsibilities and task sequences On the other hand detailed codified and rigid higher order routines were found more effective for integrating personnel outsourced services and new technology

Static and Dynamic Machine Learning Based Malware Detection Methods for Windows Programs Lars Kaiser,2023-02-08 Bachelor Thesis from the year 2022 in the subject Computer Science Commercial Information Technology grade 1 0 University of Applied Sciences Essen language English abstract One goal of the thesis is to evaluate static dynamic and hybrid approaches in order to draw conclusions about the domains mentioned in the title of the thesis Consequently result oriented conclusions about the characteristics that distinguish the three approaches from each other are to be drawn from the respective publications on basis of qualitative and quantitative evaluation criteria and the knowledge gap in the comparative literature is intended to be filled by the evaluation of hybrid approaches The aim is to build a high level understanding of the different methods and to identify differences and commonalities between these approaches based on research literature that presents new approaches within these domains In particular strengths weaknesses and special properties of the three domains are to be determined The second goal of this thesis is to develop a more comprehensive practical understanding of ML based malware detection techniques as exemplified by the practical section Here the ML workflow model is used to propose and implement a static malware detector step by step using the Python programming language and various ML algorithms Accordingly the three primary research questions this thesis aims to address are as follows 1 Which static dynamic and hybrid ML based approaches exist both in current and past research and how do they work 2 How do the underlying methodological domains static dynamic and hybrid compare under consideration of multiple quantitative and qualitative evaluation criteria 3 How can a static malware detection model be implemented hands on in practice using the ML workflow process model as a guideline

Concentration in Solution, Stochastic Dynamic Diffusions and Mass Spectrometric Variable Intensity Bojidarka Ivanova,Michael Spiteller,2020-03-03 Academic Paper from the year 2020 in the subject Chemistry Analytical Chemistry grade Second author Michael Spiteller University of Dortmund Institut f r Umweltforschung language English abstract The idea for this contribution has its root in exact formulas connecting between measurable variable intensity of mass spectrometric peak of analyte ion and its stochastic dynamic diffusion parameter introduced more recently in our works devoted to quantitative mass spectrometry Herein we present innovative functional relations connecting among not only DSD

and I parameters but also the experimental factor temperature and the concentration of analyte in solution. The temperature is one of the most important parameters determining the ionization efficiency of analytes under soft ionization mass spectrometric conditions. The focus of the work is not only on outlining quantitative conjunctions among experimental factors respectively parameters, measurable outcomes, and molecular properties but also to help readers achieve in depth understanding of governing factors determining the ionization efficiency of analyte ions with respect to temperature at a molecular level. Another important aspect for studying is that all theoretical proposals introduced so far are based on stochastic dynamics. The latter field however is very broad. It encompasses a large set of mathematical methods applicable to explain diverse phenomena not only in the Chemistry but also in the Physics, Astronomy, Economy, and many more research areas. The methodology used to our principle theory behind the derivation of model functional relations, our innovative empirical modification of known relationship, and corresponding definition of the DSD parameter as a function of the measurable variable intensity are based on Box-Cox method, Einstein's concept of diffusion within his molecular kinetic theory of heat, the forward Fokker-Planck equation or the forward Kolmogorov equation where we empirically modify the characteristic function diffusion and its application to Ornstein-Uhlenbeck process, approximations to a Wiener process, Gillespie's interpretation of Ornstein-Uhlenbeck process, and its exact numerical solution respectively. Due to complexity of many of the soft ionization mass spectrometric phenomena and the interconnection of different concepts behind our stochastic dynamic theory of exact quantification of the variable intensity, we hope that the readers will be able to gain the background to the different mass spectrometric phenomena and theories to more advanced primary literature sources which can be found in the corresponding reference sections.
