Dynamic Interactions in Neural Networks: Models and Data Michael A. Arbib, 1989 The study of neural networks is enjoying a great renaissance both in computational neuroscience the development of information processing models of living brains and in neural computing the use of neurally inspired concepts in the construction of intelligent machines Thus the title of this volume has two interpretations It presents models and data on the dynamic interactions occurring in the brain and it exhibits the dynamic interactions between research in computational neuroscience and in neural computing as scientists seek to find common principles to guide the understanding of the living brain and the design of artificial neural networks This collection of contributions presents the current state of research future trends and open problems in an exciting field of today s science

Dynamic Interactions in Neural Networks: Models and Data Michael A. Arbib, Shun-ichi Amari, 2012-12-06 This is an exciting time The study of neural networks is enjoying a great renaissance both in computational neuroscience the development of information processing models of living brains and in neural computing the use of neurally inspired concepts in the construction of intelligent machines Thus the title of this volume **Dynamic Interactions in Neural Networks Models and Data** can be given two interpretations We present models and data on the dynamic interactions occurring in the brain and we also exhibit the dynamic interactions between research in computational neuroscience and in neural computing as scientists seek to find common principles that may guide us in the understanding of our own brains and in the design of artificial neural networks In fact the book title has yet a third interpretation It is based on the U S Japan Seminar on Competition and Cooperation in Neural Nets which we organized at the University of Southern California Los Angeles May 18 22 1987 and is thus the record of interaction of scientists on both sides of the Pacific in advancing the frontiers of this dynamic re born field The book focuses on three major aspects of neural network function learning perception and action More specifically the chapters are grouped under three headings Development and Learning in Adaptive Networks Visual Function and Motor Control and the Cerebellum

Interpersonal Synchrony and Network Dynamics in Social Interaction, volume II Viktor Müller,Peter Erik Keller,Merle Theresa Fairhurst,Markus Franziskus Mueller,Floris Tijmen Van Vugt,2025-09-15 Coordinated social interaction belongs to our everyday life whenever individuals align their behavior with each other in time and space A substantial part of social interaction and collective behavior consists in synchronized goal directed actions involving two or more individuals These actions are regulated by various factors that work together calibrated by appropriate coupling mechanisms within and between individuals and their brains Hyperscanning studies simultaneous signal recording from multiple individuals has shown that synchronization within and between brains as well as within and between physiological systems and subsystems e g respiratory cardiac systems body movements etc plays a crucial role for social interaction phenomena They can be described most effectively in terms of the cooperation of several parts of the system or subsystems Emerging complex network dynamics and its topology represent an imprint of such complex systems behavior and have been outlined in several studies by means of a graph theoretical approach There has been an important growth in publications on inter brain or hyper brain connectivity and network dynamics over the last 20 years However a certain knowledge gap remains between behavioral and neural and also other physiological and physical representations or features and it requires further intensive research **IEEE/IFAC Joint Symposium on Computer-Aided Control System Design** Sven Erik Mattsson,J.
